

ENVIRONMENT POLICY

At Kempe Engineering we operate in a manner which protects the environment.

We pursue environmental performance which meets or exceeds regulatory requirements and voluntary objectives guided by principles of the ISO 14000 series of Environmental Management.

We meet these objectives by:

- Identifying and complying with legislative requirement for the protection of the environment
- Promoting the selection / use of material / substances that will be least harmful to the environment
- Recycling where possible so as to minimise landfill and maximise retention of materials with a reuse value
- Providing environmental stewardship in particular by improving waste management technology and practices
- Continuing to develop leading edge products and services that enhance health, safety and environmental outcomes

Our environmental management processes are an integral part of our business.
