

Control Valves & Regulators

Kempe provide a broad range of control and pressure regulating valve products designed to meet the most stringent requirements of the fluid and gas processing market.

Our products have been selected to achieve high performance functionality. They cater for low pressure, high volume and high pressure, low volume applications.

Our product range includes:

- Pressure Regulators
- Flow Regulators
- Diaphragm Control
- Linear Control
- "V" Ball Control
- High Performance Butterfly Control
- Eccentric Plug Control
- Tank Blanketing Systems
- Tank Vent Systems
- Application Design
